## 2. Families of Business (FOBs) and Departments

### NOTES:

- \* Implementation date pending confirmed tag solution.
- Effective May, 2015 Direct to Consumer aka CFC merchandise requires EPC ticketing. This may lead to process efficiencies at the vendor facility and will accommodate customer returns at Macy's and Bloomingdale's stores.
- RFID is required for all merchandise in the departments below for Macy's Department Stores and Bloomingdale's Department Stores, including all CFC/.com merchandise. RFID is not required for Macy's Backstage and Bloomingdale's Outlet merchandise.
- Using the information provided in the Approved Inlay column, determine the appropriate inlay for each department based on specifications grid in [Section 4](#).

### 3. Getting Started

As you begin to prepare to incorporate the use and application of EPC-enabled RFID technology into your packaging, here are some steps to help you become prepared to get started:

1. **UNDERSTANDING THE REQUIREMENTS:** This document should provide the necessary basic requirements expected of you. Additional information may be obtained from our team. Additional contacts will be provided as needed.
  
2. **GETTING EDUCATED:** GS1 US offers low cost education/training and user group available to you as you begin your participation. For more information about how to prepare, visit: <http://www.gs1us.org/industries/apparel/epc-item-level-readiness-program>
  
3. **IDENTIFYING INTERNAL STAKEHOLDERS AND DEVELOPING YOUR TEAM:**
  - a. Packaging
  - b. Merchandising
  - c. IT/Operations
  
4. **DETERMINING YOUR TAGGING OPTIONS:**
  - a. Tag/Inlay Selection based on approved and certified list of vendors
  - b. Determine tag application options (integrated or apply secondary tag)
  - c. Determine how to best encode/apply the tag to ensure proper identification and application to the right product.
  
5. **DEVELOPING THE APPLICATION PROCESS:**
  - a. Review tag placement options
  - b. Determine appropriate placement location for each SKU of interest – aim for uniformity
  - c. Develop quality check process
  - d. Finalize information that will be included on the EPC label
  - e. Ensure EPC Symbol is included
  - f. All EDI documents must remain unmodified for RFID implementation. This includes the EDI 856 Advance Ship Notice. Do not transmit EPC's in lieu of U.P.C./GTIN/EAN codes, etc.
  
6. **TESTING YOUR WORK PRODUCT**
  - a. Ensure proper encoding of the sGTIN for a specific product
  - b. Ensure the tag looks correct and includes all proper information
  - c. Send labels/tags to Macy's for review/testing

## 4. General Tag Requirements

- **RFID is required for all merchandise in the departments below for Macy's Department Stores and Bloomingdale's Department Stores, including all CFC/.com merchandise. RFID is not required for Macy's Backstage and Bloomingdale's Outlet merchandise.**
- All tags should be GS1 UHF Gen 2 certified operating in the 860 MHz - 960 MHz frequency range.
- All tags should be sGTIN-96 encoded properly for the specific product SKU, with sGTIN per the GS1 EPCglobal Tag Data Standard.
- Please identify the solution provider that you will be using for the inlay. For your convenience, we have already determined that the following tag inlays are compatible in our stores.
- All tags should be purchased from licensees of Round Rock Research, LLC. A list of these licensees may be found at its website [www.roundrockresearch.com](http://www.roundrockresearch.com).
- Macy's is continuing to test options for all categories noted as "TBD". Please continue to review Macysnet for updated information.
- All tags must undergo quality and data integrity checks prior to shipment into Macy's stores. Please send sample of 20 EPC labels for the same U.P.C. with different serial numbers, to Macy's for validation and approval prior to shipping to the address below. Vendor contact information including contact name, phone number and email address must be included with all requests.

Macy's  
145 Progress Place  
Springdale, OH 45246  
Attn: Kris Whitney

- All products containing EPC must have an indication that an EPC is present using the EPC symbol on the label. This symbol should be placed on a non-perforated section on the front of the ticket NEXT TO THE UPC.

- Guidelines for use of the symbol may be found here: [http://www.gs1.org/epcglobal/public\\_policy/manufacturers\\_tool\\_kit](http://www.gs1.org/epcglobal/public_policy/manufacturers_tool_kit)

## 5. Approved Tag Inlays

- For the department listed in the “Approved Inlays” column in [Section 2](#), use the inlay # indicated below

Inlay Number	3	4	7	8	9	11	12	13	14	15	16	17	19
Tag Mfg/ Model	Avery 236	Avery 370	Avery 320	Smartrac Belt	Smartrac Web	Alien 9728-GT	Alien 9730-e	Invengo Butterfly	Invengo X-Wing	SML GB3-R6	Avery AD237	Avery AD 321	SML Maze
Chip type	NXP U7	NXP U7	NXP U7	NXP U8 or Impinj R6	NXP U8 or Impinj R6	Higgs 4	Higgs 4	NXP U7 or Impinj R6	NXP U7 or Impinj R6	Impinj R6 or HEC	Impinj R6	Impinj R6	NXP U7 or U8 or Impinj R6

Inlay Number	20	22	23	24	25	26	27	28	29	30	31	32	33
Tag Mfg/ Model	SML GBM	Tageos (large) 410	SML GB3	Avery 238	Smartrac Mimi Web	Smartrac Belt MC	SML GB4	Avery 385	Alien 9828	Alien 9862	Tageo 241	Tageo 430	Data2 3315R6
Chip type	NXP U7	Impinj R6	NXP U8 Or HEC	NXP U8	NXP U8 or Impinj R6	NXP U8 or Impinj R6	NXP U8	NXP U8	Higgs EC	Higgs EC	NXP U7 or U8	NXP U8	Impinj R6

Inlay Number	34	35	36	37	38	39	40
Tag Mfg/ Model	Avery 383	Avery 372	Avery 324	SML GB5	Checkpoint Vortex	Checkpoint Triumph	SML GB14
Chip type	NXP U8	NXP U8	NXP U8	NXP U8	NXP U8	NXP U8	NXP U8

## 6. Tag Application

- RFID tags should be *integrated* into existing hangtags or labels containing the UPC barcode with the EPC symbol included.
- Ensure that RFID antennae do not cross any retail ticket perforations.
- If an integrated tag presents challenges in meeting the roll out schedule, Macy's may consider the application of a secondary tag (in addition to the existing UPC barcode) containing the EPC, for the short term. If a secondary tag is applied it must meet the following specifications:
  - Plain, white tag with EPC symbol and human readable UPC number.
  - EPC secondary tags must not include an additional UPC barcode.
  - EPC secondary tags must NOT include a retail price.
  - As with all tags, sample must be sent in for certification by Macy's.
- All tags, whether integrated into existing UPC barcode tags or in a secondary tag, should be applied where tags are currently placed today.

## 7. Product Identification

The benefits of EPC-enabled RFID rely completely on proper identification of a specific product beyond the SKU level. It requires a serialized identifier for each individual item and encoding of that identification into an EPC (Electronic Product Code).

EPC is simply a data structure for encoding a GTIN (which is the product identifier you encode in a UPC bar code today) plus a serial number into the RFID tag. Ensure you and/or your providers have a good understanding of how to move from UPC to EPC. More information on this can be obtained from our partners at GS1 US:

<http://www.gs1us.org/industries/apparel/epc-item-level-readiness-program>

Additional GS1 information is available at: [RFID Commonly Asked Questions – Dispelling the Myths](#)

Each supplier should develop a strategy for serializing their products by reviewing the best practices and guidelines of the industry. GS1 US can provide more information on the industry best practices. There are instances where Macy's will need to encode and apply tags for your products (returns from customers, misplaced or lost tags, etc). While the industry determines the best practice for managing serialization across the supply chain for these exceptions instances, Macy's will coordinate how to avoid duplication of serialized products.
